Junior Full-Stack Software Developer

Full-Stack Software Developer with 1.5+ years of experience building and maintaining SaaS applications using modern web technologies. Experienced in developing scalable backend services, responsive frontend applications, and secure RESTful APIs using Laravel, FastAPI, Vue.js, React.js, and TypeScript. Currently studying Data Science and Machine Learning with Python, expanding expertise in Python-based data analysis and machine learning. Passionate about writing clean, maintainable code, solving complex technical challenges, and contributing effectively within collaborative development teams.

Core Technical Skills

Backend

- Laravel (PHP)
- FastAPI (Python)
- RESTful API Development
- Clean Architecture
- Software Design Patterns
- Authentication & Authorization (JWT, RBAC)

Frontend

- Vue.js
- React.js
- TypeScript & JavaScript (ES6+)
- Tailwind CSS
- Component-Based Architecture
- State Management (Pinia, Zustand)

Database

- MySQL
- PostgreSQL
- Database Schema Design

Integrations & Tools

- REST APIs
- Third-Party API Integration
- Cloudflare R2/R3 Object Storage
- Resend Email Integration
- Git, GitHub and GitLab

Professional Experience

Software Engineer / Full-Stack Developer (Trainee)

Yaj Tech Pvt. Ltd. (Under Ambition Guru **Jul 2025 – Jan 2026**

https://sociair.com/ , https://ag.sociair.io

- Developed and maintained full-stack features for a multi-tenant SaaS CRM and ERP platform using Laravel, Vue.js, Quasar Framework, MySQL, and RESTful APIs, ensuring scalable and maintainable solutions.
- Designed, integrated, and optimized backend APIs, database queries, and reusable frontend components while collaborating with cross-functional teams to deliver high-quality features and improve application performance.
- Mentored newly onboarded developers and QA engineers by explaining system architecture, development workflows, coding standards, Git workflows, and debugging methodologies, helping accelerate onboarding and team productivity.
- Investigated, debugged, and resolved complex frontend and backend issues, performed code reviews, and implemented performance improvements that enhanced application stability, code quality, and overall user experience.

Software Engineer / Junior Full-Stack Developer

ASI Tech **Apr 2026 – Aug 2026**

- Led the architecture, planning, and end-to-end development of a modular CRM platform, defining technical standards, breaking down features into development milestones, and coordinating implementation to ensure timely delivery and maintainable solutions.
- Engineered high-performance backend services using FastAPI with asynchronous request handling, JWT-based authentication, Role-Based Access Control (RBAC), database migrations, and optimized relational database design for scalable business workflows.
- Developed responsive and reusable frontend applications using React, TypeScript, and Zustand, implementing dashboards, deals, tasks, advanced state management, and role-based user interfaces to improve usability, performance, and maintainability.
- Designed and integrated background job processing, email notification services, Cloudflare object storage, and third-party REST API integrations while optimizing API performance, troubleshooting production issues, and maintaining clean, scalable software architecture.

Education

Bachelor of Information Technology (BIT)

College: Texas College of Management & IT

University: Lincoln University College Malaysia

Status: Graduated

Data Science and Machine Learning with Python

College: Deerwalk Training Center.

Status: Currently Studying
